

**BILL 124 CERTIFIED, Building Permit Designer Forms for:
PLUMBING
HVAC HOUSE; RESIDENTIAL Heat Loss and Duct Design
BUILDING SERVICES:**

What is a Building Code Identification Number (BCIN)?

A Building Code Identification Number, or BCIN, is the unique identifying number assigned to individuals who file their qualifications with the Ministry of Municipal Affairs and Housing, and firms which register with the Ministry. The BCIN is used for several purposes: you may need to provide it on building permit applications in all correspondence with the Ministry, and in any other building-related work that requires a qualified person or registered firm.
